

Essex helped me out so much....these cranes are more than I ever expected they would be.”

- Bud Maenner, President, Chesapeake Mechanical

Chesapeake Mechanical, Inc. was subcontracted by SmitHahn Company, Inc to assist with the \$500 million expansion of the Essroc Cement Plant in Martinsburg, WV. The expansion consists of building towers, silos, collectors and process ducts. Chesapeake selected Essex Crane Rental Corp. to provide two cranes to assist with completing the project.

Essex first provided a Manitowoc 4100W with tower attachment, which was used to reach the tallest parts of the towers, silos and collectors.

The LR1300 with luffing jib was subsequently added to the site to place the hard to reach process duct work. Lifts of the 32' diameter sections ranged from 70-85K lbs.

“The LR1300 is awesome. Working in tight quarters, it has the capacity and reach to make our lifts securely. It is so smooth, at times it appears the load is not moving.”

- Dave Angus, Superintendent, Chesapeake Mechanical

The expansion is expected to be completed in early 2010 and once finished it is rumored the new building will be the tallest in West Virginia.

Essex is committed to providing its customers with the most dependable cranes in the industry. The Essroc Cement project expansion provides another example of how Essex works everyday to help keep its customers on schedule and budget.
