

“The entire experience, from delivery to rig-down was very smooth. The service was excellent throughout the entire rental.”

- Terry Kirsch, Equipment Superintendent, Hawkins Construction

Hawkins Construction Company is a 3rd generation family-owned construction firm that provides general contracting, construction management and design-build services. For this project, Hawkins was contracted by Mutual of Omaha to construct a 136,000 square foot, 7-story parking garage in Omaha, NE.

The parking structure consisted of pre-cast concrete including 58,000 pound double Ts, columns, beams and spandrels. Hawkins turned to Essex Crane Rental Corp. to provide a dependable crane that would make the required 20 - 22 piece lifts each day. Essex supplied the newest addition to its fleet, the Manitowoc 14000.

“Good crane, nearly 100% reliable. Very solid picking platform throughout the project.”

- Craig Hamilton, Jobsite Superintendent, Hawkins Construction.

“The entire experience, from delivery to rig-down was very smooth. The service was excellent throughout the entire rental,” stated Terry Kirsch, Equipment Superintendent, Hawkins Construction. Essex is committed providing its customers with the most dependable cranes in the industry. The Hawkins parking structure provides another example of how everyday Essex works to help keep its customers on schedule and budget.
